## Iowa Assessments

### October, 2011

The Iowa Test results are given as grade-level equivalents. The grade-level equivalent is a decimal number that describes performance in terms of grade-level and months. For example, we would expect that our eighth grade students would score at least at an 8.1 because they took the test at the eighth grade, first month. If a student scored a 9.1, this student's score is like the one a typical student at the end of the first month of the ninth grade would likely get on the same test.
